# BIO.NET - THE REPORT APP

MOBILE COMFORT WITH SAFETY

# // MORE AUTONOMY FOR THE INDEPENDENT PHYSICIAN

You need immediate access to the patient's laboratory results during your visit?

You need patient's immediate test results while conducting rounds? An electronic record displaying this information could give you a prompt view of a diagnosis, best care treatment and qualified medication. All involved healthcare professionals could possibly share the results in a multidisciplinary manner and increase the benefit to all your patients.

## RETRIEVE LABORATORY RESULTS: WHENEVER AND WHEREVER YOU WANT

Our new bio.net app allows you the mobile access to your patients' laboratory reports through your smartphone or tablet.

- Simple and meaningful presentation of medical specialist reports on the display, including Elpho curves
- Colored graphics and highlighting of pathological results
- Search, e.g. for patient names and specific laboratory parameters
- Available free of charge for Android and iOS

Our bio.net app keeps you up to date around the clock. Wherever you are, at any time.

## THE BIO.NET APP OFFERS YOU EVEN MORE THAN MOBILE REPORTS

- Direct links to contact persons and to Bioscientia's online test list with information on parameters and reference ranges as well as interpretation assistance
- NEW: You define which findings you want to receive via push message and set filters in the app, e.g. „all urgent findings“ or „all pathological values“. The push function will notify you automatically
- With just one click you will also receive the current report as a PDF file sent to the stored email address.

Strict and comprehensive data protection has the highest priority for online offerings in the healthcare sector.

## Our software partner possesses years of experience and guarantees:

- Extremely high security through external SSL encryption and additional internal dynamic AES256 encryption
- No local storage of access or patient data
- Classic user authentication with user and password. Can optionally be combined with fingerprint scanner
- The system is secured against hacking and phishing. Passwords cannot even be reconstructed by the software developer itself

We are pleased to provide you with a detailed producer's declaration if required

## THE BIO.NET APP: SERVICE TO APPLAUD

Download the app from your App Store and test it. Afterwards you can simply register.

For IT support, kindly send an email to [support.dv@bioscientia.de](mailto:support.dv@bioscientia.de)

For any other query, please contact your local Bioscientia sales manager.

for Android
